

## Problema 7 de pe fisa:

```
import java.util.Scanner; ;

public class FisadinClasa {

    public static void main(String[] args) {

        Scanner masa = new Scanner (System.in) ;

        System.out.print("op=");

        String op=masa.nextLine();

        System.out.print("x=");

        double x=masa.nextDouble () ;

        System.out.print("y=");

        double y=masa.nextDouble () ;

        if("+".contentEquals(op))

            System.out.println(x+y) ;

        if("-".contentEquals(op))

            System.out.println(x-y) ;

        if("*".contentEquals(op))

            System.out.println(x*y) ;

        if("/".contentEquals(op))

            System.out.println(x/y) ;

        masa.close();

    }

}
```
